

Testimonial for Al Saeedi

Last week I had my car stopped on the way while I was driving for a meeting and somehow, I managed to park my car near petrol station.

Initially it did not look like a battery problem but I thought to call Anis for the same. Though he was in Germany but was humble enough to answer my call and put me to Mr Arun who later guided me.

I send the picture of my battery and the location map where I was. The recovery van was there in approx. 45 min meanwhile I was able reschedule my appointment to later time.

These guys who came were very professional and they immediately me the actual problem which was not just battery change but something more serious as I should rush to nearest workshop.

I got it rectified immediately and needless to say Mr Arun called me asked if the repair was done and have I reached home safely and if I needed some more help.

I am very much happy with the services and would recommend Al Saeedi to all.

Thanks 

Dr. Tarun Bhagchandani
